Targeting an Internship or Entry-Level Opportunity in...

Software Engineering

- Upcoming MSc Computing graduate offering a strong foundation in software engineering and programming principles across multiple platforms.
- Experience in object-oriented programming; developing, testing and debugging code; designing interfaces; and managing databases.
- Quickly learn and master new technologies; successful working in both team and self-directed settings.

Studying in-depth:

- Python
- JavaScript
- HTML
- CSS
- SQL

About Me

I'm a very driven and open minded person and have practically been practically raised on computers and books (my first degree was philosophy, so I'm covering all bases). After starting to teach myself programming in 2021, I found a lot of passion and aptitude for it, hence enrolling on my masters course. Consequently, I'd be thrilled to have the opportunity provided to me to begin my career in a subject I'm deeply excited about and for companies I really believe in.

Education

Cardiff University

September 2022 – September 2023

Pursuing an MSc in Computing
(TBA)

Courses Enrolled:

- Computational Thinking
- Fundamentals Of Programming
- Algorithms, Data Structures And Programming
- Topics, Research And Skills In Computing
- Software Engineering
- Social Computing
- Cybersecurity (Optional)

The University of Manchester

September 2018 – July 2021

BA in Philosophy (2:1)

Prestatyn High School Sixth Form

September 2016 – July 2018
